

# Enceinte d'essai d'égouttage DTC-12 (IPX1/IPX2)

Réf. : DTC-12

36 MONTH WARRANTY CE FDA

## SPÉCIFICATIONS PAR MODÈLE

| Caractéristique                                                  | Valeur                                                        |
|------------------------------------------------------------------|---------------------------------------------------------------|
| Inner Chamber Size (WxDxH)(mm)                                   | 1000×1000×1000                                                |
| Double Outer Size (WxD ×H)(mm)                                   | 1550×1480×1950                                                |
| Dripping Chamber Size (WxDxH)(mm)                                | 800×800                                                       |
| Turntable Diameter (mm)                                          | 500                                                           |
| Maximum Sample Size                                              | 300×300×300                                                   |
| Power (V)/Power (KW)                                             | 220/3                                                         |
| The Distance between the Drip Chamber and the Tested Sample (mm) | 200                                                           |
| Diameter of the Drip Hole (mm)                                   | φ0.4                                                          |
| Water Hole Spacing (mm)                                          | 20                                                            |
| Rainfall (mm)                                                    | 1or 3 adjustable per minute                                   |
| Test Time (min)                                                  | 1~999,999 (setting)                                           |
| Test Bench Speed (rpm)                                           | 1 ~3 adjustable (IP 1.2 standard turntable can be tilted 15°) |
| Turn Load (kg)                                                   | 20                                                            |
| Temperature (°C)                                                 | 5 ~40                                                         |
| Relative Temperature (RH)                                        | 85%                                                           |
| Inner Chamber Material                                           | SUS304 stainless steel                                        |
